

High Usage Evidence Download Packs

Developed for Public Space CCTV systems where recorded images are downloaded on a regular basis to CD or DVD for Police evidence.

The accepted industry norm for downloading images is that 2 non-rewritable discs each bearing matching Unique Reference Numbers (URN's) are made. One disc, the Working Copy is handed to the Police, the second, the Archive Copy is retained on site in a secure manner. The archive copy may be required for corroborative purposes in court if the veracity of the Working Copy is challenged.

Packs are supplied in multiples of 25 pairs of colour coded Working & Archive discs bearing Unique Reference Numbers and NCR set Download Log Sheets.

Corporate Branding

For clients wishing to maintain their corporate identity bespoke branding is also available on request.

Secure Evidence Cabinet

A secure evidence enclosure is also available. Designed for wall mounting and holding up to 25 Archive discs and associated documentation.
