BESPOKE

# Statutory Information Signage

VMS supply signs in two different formats and range of materials & finishes to complement most environments.

Our bespoke signs are manufactured in house to order. This means that during the printing process we can include the site operators name and contact details as standard.

Installation companies details and logos can also be included at no extra cost.

3 Versions are available:

## CCTV

## ANPR

## CCTV & AUDIO

## The Data Protection Act

In order to comply with the requirements of the Data Protection Act signs must be mounted adjacent to the entry to CCTV surveillance areas. In the case of external area surveillance signs should be fixed to the perimeter on the approaches to and at strategic positions within less well defined areas such as town centre schemes. These signs must state that CCTV recording is taking place, the purposes of the scheme and contact details of the Data Controller.
